Course description

Furnish learners with enough information to enable them to determine what a small static website needs in order to look professional and work effectively. To equip learners with the information necessary to write basic HTML and CSS code and make changes, configure meta tags, embed images and link pages.

Course outcomes

- Configure Keyword and Description meta tags
- Describe the difference between HTML and CSS script
- Know how to upload a web page to the internet
- Distinguish between the header and body sections on a web page
- Configure image tags, create links and embed photographs

How will the course be taught?

The course will be taught online via Zoom and will be a live interactive class. Joining instructions along with unique log in for the session will be emailed to you by our support services team prior to the course start date so please check your email address prior to the class. To take part in the course learners will need:

A computer, laptop, phone or tablet connected to the internet and able to view a live video stream. In order to follow and complete course tasks a PC (either laptop or desktop) or an Apple Mac (either laptop or desktop) is required. Mobile phones and tablets are not suitable.

Could I gain a certificate?

No qualifications are required, but basic computer skills are a must.

What do I need to bring?

Writing materials to make notes and a USB/memory stick.
